

Application No. 10/589,687
Filed: August 17, 2006
TC Art Unit: 1647
Confirmation No.: 9909

REMARKS

In response to the Restriction Requirement dated April 21, 2008, the Applicants, with traverse, elect Group I (claims 1-11) for prosecution at this time. Applicants reserve the right to request joinder of certain other claims when allowable subject matter is identified.

Claim 1 has been amended herein.

Restriction was on the grounds that claim 1 lacks unity of invention as being anticipated by Wittenmayer et al. The reference teaches that conspicuously low profilin-1 levels are related to the tumorigenic state of the tested cells. In contrast, as shown in the Examples, in the method of the invention, increased (or elevated) profilin-1 levels indicate a positive diagnosis for a disease or condition associated with endothelial cell dysfunction (such as diabetic vascular disease, atherosclerosis, etc. Claim 1 has been amended to make this distinction clear.

Thus, Applicants submit that claim 1 is not anticipated by Wittenmayer et al. and, infact, teaches the exact opposite. Thus, Applicants request that the restriction requirement be withdrawn.
